

Position: Junior Engineer - Production
Division: Sugar Projects Division
Location: Chennai, India
Experience: 4-5 years of experience in a production or fabrication environment
Qualification: Bachelor of Engineering in Mechanical or Production

Shrijee is a globally known supplier of turnkey sugarcane factory and sugar refinery projects. Established in 1976, Shrijee has supplied equipment to more than 400 sugar factories in India and to clients in more than 30 countries. The corporate headquarters are in Mumbai (India) and regional offices are in Delhi, Ahmednagar and Chennai. Shrijee has three fully equipped manufacturing facilities located in the western and southern parts of India.

We have more than 150 people in our team, including 55 Engineers and 13 MBAs. In addition to these, at any given time, we usually have 100-200 people working on our sites in India & overseas.

We are looking for a “**Junior Engineer - Production**” in the Production department at our Chennai factory. Candidate will report to the Deputy Works Manager in the factory.

Key Responsibilities:

1. Oversee the manufacturing processes of heavy fabrication components and sugar equipment, ensuring efficient use of resources and adherence to production schedules as well as quality standards.
2. Develop manpower planning to meet production targets efficiently.
3. Collaborate with design and engineering team to review technical drawings, resolve design issues and provide input for manufacturability improvements.
4. Identify areas for process improvement and implement solutions to enhance production efficiency and reduce waste. Participate in continuous improvement initiatives and lean manufacturing projects.
5. Coordination with procurement and supply chain departments to ensure timely availability of raw materials and components for production.
6. Ensure all production activities are conducted in accordance with safety regulations and company policies. Conduct regular safety audits and risk assessments, implementing corrective actions as necessary.
7. Maintain accurate production records and prepare regular reports on production performance, quality metrics, and project status. Develop and update standard operating procedures (SOPs) and work instructions.

We are looking for:

1. Strong understanding of Heavy fabrication processes, materials, equipment and structures
2. Proficiency in CAD software and other relevant engineering tools.
3. Knowledge of Sugar Industry equipment is an added benefit.
4. Knowledge of lean manufacturing principles and quality control methodologies
5. Good Knowledge of Quality Procedure.
6. Strong communication and interpersonal skills.
7. Strong computer skills (MS Word, MS Excel, MS PPT, Internet).
8. Team spirit, good work ethic and high integrity (we do a thorough background check).

The salary offered will be competitive. We offer a professional work environment. Please visit our website for details about us: www.shrijee.com.

Interested candidates are invited to submit their resume and cover letter detailing their relevant experience and qualifications to: careers@shrijee.com. Please include "Junior Engineer - Production Application" in the subject line of your email
